About me

I'm an analytical thinker and in past projects I was able to quickly add value to the team. I like to look into technologies which are new to me and take the lead whenever it's needed.

Skill

Scrum

Spring Boot

Spring

Unit Testing

GIT

IntelliJ⋆5.5 Maven⋆5 AngularJS⋆3.5

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

introduction

I am an experienced software engineer with extensive knowledge of web applications and a deep knowledge of Java, SQL, security, and programming in general.

During my work, but also while spending time on my hobbies, I also gained a lot of experience with infrastructure. I especially have a lot of experience in troubleshooting at the edge of the application and its infrastructure.

More then ten years ago I completed my master degree in Computer Science from the University of Eindhoven, and I still profit from the solid foundation it gave me every day.

I prefer a role as architect, lead developer, or senior developer in a project (in the Amsterdam region) in which quality is one of the core values. The ideal project has time pressure, uses technologies such as Spring (Boot), JPA & Java 11 (at least) and is developed using agile methodologies. I like to work in a team and have a lot of experience with that.

education

Dec 2021	Offensive Security Web Expert	OSWE
Oct 2021	Professional Scrum Developer I	PSD I
Dec 2016	Professional Scrum Master I	PSM I
Dec 2014	Buitengewoon Opsporingsambtenaar (special investigator)	BOA
Sep 2012	Oracle Certified Web Component Developer	OCEJWCD
Apr 2012	Oracle Certified Java Professional	OCJP
2006-2008	Master Computer Science and Engineering	TU Eindhoven
2002-2007	Bachelor Computer Science	TU Eindhoven
1995-2002	Atheneum	Newman College, Breda

experience

2020-2021 Loomis Pay — Kotlin Developer (interim); 32u per week
Via Ximedes I worked for Loomis Pay on a financial backend system.
Kotlin, Kafka, Spring Boot, AWS

2019-2020 ThreatFabric — Full Stack Developer (interim); 32u per week
For ThreatFabric I worked on CSD. At the same time I extended the CSD Android library and constructed an iOS library (using Swift). This allows our customers to respond to potential (future) threats.
AngularJS, Hibernate, PostgreSQL, Spring Boot, AWS, Docker, Android, Swift

2019-2020 Baeldung — Technial Author; 4h a week
As a technical author, I wrote a articles about different technical subjects.
Java 13, Spring Boot, Java Streams

Jan-Apr 2019 Ximedes — Software Development Consultant; 32h a week
At Ximedes I used to work in the Faretech-team, I was (temporary) responsible for the maintenance of one of the products of Ximedes. I analyzed and resolve a lot of persistent errors.
OV, mifare, NFC, Java, Protobuf, Kibana, Kotlin, AWS

2017-present openHAB @ GitHub — Open Source Project Maintainer; 8h a week
Since 2017 I'm a maintainer for openHAB, a wide spread open-source Java-based Domotica system. I help by reviewing the big amount of incoming community pull requests.
Java, OSGI, open-source, Travis, IoT, Domotica

2017-present RIPE NCC — Software Development Consultant; 32h a week
At RIPE NCC I use to work within one of three international scrum teams. The team was responsible for many different applications in different technology stacks, such as Wicket, Scala Play and AngularJS.
*Spring Boot, Scala, PostgreSQL, AngularJS, Lucene, Kibana, international collaboration*

Testimonials

Martin is far more than a regular Developer, he has very good analytic capabilities which he used to help us in the design and conception phase; he provided some expertise on how to best implement functionalities and was a perfect fit in our team, making the project very pleasant.

Gaetan van Diemen, Business Manager at ThreatFabric (21-09-2018)

Jun-Jul 2018	ThreatFabric	Full Stack Developer (interim)

For ThreatFabric I worked on CSD. For this application, I made a lot of changes to make it better and more versatile. This assignment was finished within the agreed timeframe and a satisfied client.
Java EE, AngularJS, OpenJPA, HTML5

Nov 2016	Ximedes	Pre-sales Consultant

To support a sales process I visited Stockholm together with a Ximedes sales employee. There we organized a successful workshop for a big Swedish bank.
Sales, online payments, POS, organising workshops, international

Nov 2016	GVB - OV-chipkaart	Software Engineer

public transport, mifare, NFC

2015-2016	Rabobank - OmniKassa	Software Architect; 32h a week

For the Rabobank I worked as an architect in a team of seven developers, we worked on a new version of the Rabobank OmniKassa
PCI, online payments, Spring Boot, Liquibase, Cucumber, MyBatis, XL Deploy / Deploy IT, IBM Websphere (WAS), Docker

2015-2016	Alphabet - Carlease	Software Architect Java
2014-2015	Police Department, Unit Noord Holland	Digital Operational Specialist

Python, C++, Cybersecurity, computer forensics, GoLang

2013-2014	NS HiSpeed	Senior Software Engineer Java
2012-2014	Sogeti - Java education	Coach; approx 8h a week

For Sogeti I (part-time) coached unexperienced Java developers and guided them to earn there initial Java certificate (OCJP), a few times I guided a group of developers from India. One of those times I went to Mumbai for two weeks to coach a group of 8 developers on site.
coaching, international collaboration

2012-2014	Logius / ICTU	Senior Software Engineer

EJB, DB2, JMS, ebMS, Spring MVC, Spring Security, Easymock, Websphere (WAS)

2009-2012	Copernica	Software Engineer / Lead developer
2008-2009	MDS Websolutions, currently part of Focum	Software Engineer
2007-2008	Deloitte Consulting	Graduate student Java

Java, Process minnig, data mining

2000-2007	Enilno, currently part of Focum	Developer; 12u

volunteer experiences

2011-2019	Scout group Wiawaha; Velsen-Zuid.	Boardmember
2011-2012	Red Cross, gemeente Velsen	Collection coordinator

I was responsible to supervise the local coordinators and perform the administration for the collection.

1999-2008	Scout group D'n Hartel; Terhijden	Boardmember / leader
2007	ESAC (Eindhovense Student Alps Club)	Boardmember

Besides common board tasks and the secretary I was a maintainer of the climbing gear of the ESAC (approximately 200 members).

background

Also privately I like to investigate new technologies, I'm looking into the benefits which Domotica and IoT can bring, and regularly I contribute to the open-source community.

For more than 20 years I'm an active member at the Scouting, first as a youth member, as a Scouts-leader and later more in the background as a board member and as the person responsible for the maintenance of our buildings.
